

# APRIL D. SMITH

*Integration and Implementation Engineering | B2B Integrations | EDI, API and Automation*

Bentonville, AR | 479-657-3498 | aprilsmith4026@gmail.com | linkedin.com/in/april-d-smith-5230aa46

## PROFESSIONAL SUMMARY

Technical implementation and integration professional with 10+ years of progressive experience across enterprise B2B integrations, client onboarding, systems engineering, EDI migrations, testing, troubleshooting, workflow automation, and production deployment in transportation technology. Advanced from implementation into systems engineering and integration leadership at Transplace/Uber Freight. Experienced translating business requirements into technical workflows, coordinating external partners and engineering teams, leading UAT and cutovers, resolving integration issues, and guiding solutions from discovery through deployment and hypercare. Building deeper expertise in API-based integrations and authentication to complement extensive EDI and B2B integration experience.

## TECHNICAL and IMPLEMENTATION EXPERTISE

Integration Technologies: EDI | AS2 | SFTP | FTP | API Integration | Postman | XML | TMS | SQL

Implementation and Testing: Technical Discovery | Requirements Translation | Customer Integration Testing | UAT | Production Deployment | Cutover Coordination | Hypercare | Troubleshooting | Defect Triage

Automation and Delivery: Generative AI | Google Apps Script | Power Automate | Excel Automation | Power BI | Jira | KPI Reporting | SOP Development | Workflow Optimization

## PROFESSIONAL EXPERIENCE

**UBER FREIGHT** | Rogers, AR | 2014 - Present

Transplace was acquired by Uber Freight; continuous tenure with progressive advancement across operations, implementation, systems engineering, and integration leadership.

**Lead Integration Specialist, Systems Engineering** | Aug 2025 - Present

- Serve as a technical and operational resource within Systems Engineering, helping teammates troubleshoot integration workflows, clarify requirements, resolve blockers, and maintain visibility across team priorities.
- Designed and implemented workflow automations, including Google Chat daily inbox-ownership routing and automated task-update triggers, eliminating repetitive status inquiries and improving team coordination.
- EDI Onboarding Automation (Sharkathon): Served as functional lead for a rapid automation initiative; mapped end-to-end integration workflows, translated operational needs into technical requirements, and drove testing and troubleshooting through launch.
- Partner with Engineering, Operations, and leadership on integration and workflow improvements, defining ownership, surfacing dependencies, and coordinating resolution of technical and operational issues.

**Integration Specialist, Systems Engineering** | Jan 2022 - Aug 2025

- B2B Carrier Migration (Project Lead): Directed migration of 1,500+ high-volume carriers representing 90%+ of active EDI traffic, managing technical dependencies, partner communication, testing, connection changes, and production cutovers with zero business disruption.
- Supported B2B integration connectivity and data-exchange workflows using EDI, AS2, SFTP, and FTP; coordinated external partners and internal engineering resources to troubleshoot defects and distinguish integration failures from business-rule issues.
- Built Jira dashboards and cross-functional reporting across Engineering, Operations, and external partners; reduced manual data entry by 95% through Excel automation and accelerated carrier response times by 80%.
- Modernized integration operations through SOPs, intake improvements, workflow automation, and an EDI self-service portal hackathon designed to reduce repetitive support escalations.

### **Implementation Analyst, IT Transportation Management | Aug 2017 - Jan 2022**

- Directed end-to-end onboarding for 200+ enterprise accounts, including requirements gathering, technical configuration, implementation planning, customer coordination, UAT, production cutover, hypercare, and stakeholder enablement.
- Led Alpha and UAT validation for new system rollouts, documented functional defects, reproduced issues, and partnered with Engineering to drive resolution before production deployment.
- Designed and delivered 300+ hours of client and internal training, established implementation milestones, analyzed operational data, and identified TMS workflow improvements; earned Team of the Year honors in 2021.

### **Carrier Communication Specialist / Accounts Payable | May 2014 - Aug 2017**

- Managed carrier-facing accounting and operational processes involving contracts, quick-pay programs, invoice discrepancies, and payment resolution while coordinating across carriers, Operations, and vendors.

### **J.B. HUNT TRANSPORT SERVICES | Lowell, AR**

#### **Cargo Claims Specialist | Jul 2012 - May 2014**

- Managed transportation claims from intake through resolution, coordinating with drivers, shippers, carriers, and internal stakeholders while balancing compliance, service, and operational impact.

## **SELECTED RECOGNITION**

---

2025 Monthly Trailblazer Nomination - Uber Freight (migration leadership, Jira workstreams, team training) | Extra Mile Shoutout - Uber Freight (2023) | Team of the Year - Transplace (2021) | PRIDE Award - Transplace | Client Commendation - Rockline Industries

## **EDUCATION and PROFESSIONAL DEVELOPMENT**

---

Bachelor's in Organizational Management - John Brown University, 2017
